

CPD and professional development Policy

inlingua Leeds is committed to improving the knowledge and skills of its entire staff through CPD sessions.

CPD sessions take place at the beginning of every term. These sessions cover the college's teaching and learning targets, classroom resources and how to use them, smart tools and how we can maximise our teaching by using the technology in the classroom and open up a world of teaching and learning opportunities through multimedia resources. In addition, we invite teachers to contribute to these sessions by asking them to present a topic in which they feel strong. This way, we aim to encourage the teaching team to benefit from each other's knowledge and experience.

Non-teaching staff are included in all relevant CPD and can request additional training and courses that will support them in their roles.

inlingua Leeds, where possible, seeks to encourage all staff to attend conferences and will cover costs if it can.
